**Una descripción cuantitativa de
Logro matemático de estudiantes latinos en el LAUSD
2015 - 2019**

Compilado por
Michael Batie Ph.D.

Noviembre 2019

Agradecimientos

El equipo SPN y STEM54

Por mucho tiempo podemos luchar para mejorar el momento
en matemáticas

INTRODUCCIÓN

¿Qué es el índice latino cero?

¿Qué es el índice latino cero? El Volumen II del Índice Latino Cero (LZI) es una compilación de los puntajes de las pruebas de matemáticas según lo medido por el régimen de pruebas estandarizadas del estado de California que abarca el período de cinco años de pruebas en los Estándares básicos comunes de matemáticas para estudiantes latinos en el Distrito Escolar Unificado de Los Ángeles (LAUSD). Este volumen es un complemento del Índice Latino Zero original publicado a principios de este año (www.theLZI.com). Los datos para este trabajo se recuperaron de [www.https://caaspp-elpac.cde.ca.gov/caaspp/](https://caaspp-elpac.cde.ca.gov/caaspp/). Una vez más, este índice de datos está organizado para cuantificar claramente el número de estudiantes latinos de matemáticas competentes en cada escuela y cada grado donde había suficientes estudiantes latinos para informar.

¿Para qué sirve el Latino Index?

La intención de la LZI es concienciar a todas las partes interesadas sobre la crisis en el LAUSD con respecto al logro de las matemáticas. Dado que las matemáticas son un prerrequisito para la participación en los entornos laborales y comerciales del siglo XXI, el LZI está destinado a fomentar la discusión, la conciencia y la acción para abordar los desafíos que enfrentan los estudiantes de color en el LAUSD.

¿Para quién es el Índice Latino Zero?

La audiencia para el LZI son todas las partes interesadas y miembros de la comunidad educativa para incluir padres, estudiantes, miembros de la comunidad, distrito escolar y funcionarios electos, administradores, maestros, paraprofesionales, empresas y todas las demás partes interesadas en el estado de la educación matemática de los estudiantes latinos. en toda la ciudad, condado, estado y nación.

¿Por qué es importante el índice latino cero?

El LZI es importante porque es un llamado a las armas cuantitativo que presenta datos que muestran las disparidades en el rendimiento matemático de los estudiantes latinos en el LAUSD.

This research was conducted to provide a comprehensive presentation that brings awareness to all concerned parties regarding the crisis in the Los Angeles Unified School District with respect to Black Students' mathematics achievement using existing online statistics and data. The major finding was that the mathematics achievement gap for Black students is alarmingly wide. Much needs to be done to meaningfully address the state of math education for Black students across the city, county, state and nation.

About the Author

Dr. Michael Batie is CEO of the STEM Education and Research Collaborative (STEMERC), a forum for systematic study and joint action to resolve pressing problems in the areas of science and math education in communities of color.

His current efforts are centered on STEM⁵⁴ a math/science resource center located in South Los Angeles (www.stem54.com), and Mobile Math and Science Labs (www.mmsl-la.com) a support program that delivers the necessary materials, supplies, equipment and support personnel for the effective teaching of Early Childhood through 12th grade math and science. There is a particular focus on Parent Empowerment in Mathematics Workshops designed to train parents in how to assist their children in Common Core mathematics

Dr Batie holds a B.S. in Physics and an M.S. in Education Foundations from Cal State LA. In 2008 the Ph.D. in Education with an emphasis on research and statistics was conferred by the University of California at Riverside.
